

## Pets First Diane's Priority Pet Care

### Testimonials

For the past fifteen years we have relied on Diane's Pets First to care for our animals.

Diane was the only pet sitter I could find when we moved here who was willing and able to give our severely diabetic cat his insulin shot twice a day. Super Chief was very placid and would arrive in the kitchen on time for his next shot. Zipper, our second diabetic cat, was the opposite...squalling and snapping with equal regularity every day. But Diane prevailed and I could stop worrying.

Once when we were out of town, Diane arrived for her nightly visit to medicate, feed, water, clean up after and console our 7 (!) cats only to find the alarm off and our terrace door wide open (after a service crew had been there). Our biggest and most assertive (a kind word for him), orange cat was missing – escaped into the wilds of West Linn to hunt. After trying all the standard lures, Diane patiently sat at the kitchen table to wait for Chili to come inside. It was 1am before he sauntered through the back door. No one else would have waited, I'm sure.

And finally, Diane is responsible for uniting us with our Lhasa Apso, Tommy, the light of my husband's life and the self-proclaimed "World's Cutest Dog." We couldn't be more grateful for everything she does.
